

Inferno Strobocop

Light Barrier

Inferno Strobocop is the next generation of Security Strobe. It is designed to produce a blinding effect and reduce the sense of locality in dark spaces. The intruder stops already in the door. The burglary results in just an attempted burglary.

Inferno Strobocop is with advantage combined with Inferno Sound Barriers for maximum effect, but can be used as a stand-alone security device.

- **Intensive irregular flashlight**
- **Hard to see - hard to take**
- **Reduces sense of locality**
- **Work with all alarm systems**

Installation of the Inferno Strobocop cheats the intruder of the few minutes that could be used between alarm activation and arrival of security or police, protecting the secured areas for that crucial period of time .

The patented irregular flashes, produced by Inferno Strobocop, reduce the judgement of distance and the sense of locality. It's hard in dark spaces to successfully carry out the burglary.

Flash intensity	7 - 12 flashes/s, irregular
Dimensions	B = 620 mm H = 240 mm D = 200 mm
Weight	5 kg
Power	230V, 50/60 Hz 1500 W
Fuse	10 A
